Searches

To the right of the recent search list is the frequent search list. This list displays the most frequent phrases that users typed into any search engine that generated a visit to your site. This is also the first graphical report available. When a section header is underlined, it is a link to a graphic representing the information under it...

The next most interesting section is the Hits and Visits detail pane. On the left, we see visits within the past 24 hours, grouped by hour. A hit is any page view. A visit is similar, but only one visit is counted when the same visitor loads many pages (hits).

Vice Stats - arantius.com - Hits and Visits, past 24 hours

Vice Stats - arantius.com - Hits and Visits, past Week

The Demographics section provides some of the best information that's difficult to get in other packages. In the Visits pane you can see a list of the recent visitors to your site, along with the visit duration (time between first and last page view). The link points to the visitor detail page for the applicable session, where you can see the path the visitor took through your site. This particular visitor was playing games on my site for about half an hour.
